## OBJECTIVE

My name is Nguyen Thanh Long, I am currently a final year student at the University of Greenwich Viet Nam. From a young age, I loved playing games and enjoyed computer-related activities, so when I graduated from Greenwich University Viet Nam, I chose an IT major. For the company's need to recruit interns, I feel that I am suitable for the company's working environment and culture. Therefore, I sent my necessary information with the desire to learn, work and contribute to the company during my internship. I have been working towards my goal to become a good programmer and project manager and bring many apps to help society. Realizing that I still lacking in soft skills and programming skills. I hope in the future the company will be a place where I will have many opportunities to develop myself, improve my skills so that I can conquer my goals.
