RELEVANT PROJECTS

BAU PROJECT (BUSINESS AS USUAL) | 10/2018 – 8/2019

QA

One of Australia's longest serving administrators of investment accounts. It is a platform where Administrators, Advisors, Investors can open accounts, get investment static data, submit & receive instruction to/from third party system which will in turn send to custodian and bank. The platform also provide reports, invoices, tax reports to related parties anh authorities.

Responsibilities	Technologies
- Read and analyze requirements from BA; - Develop test cases; - Perform test execution; - Raise/verify bug; - Support team members; - Report the test results.	- Blackbox test - Jira, Target Process - MySQL - Picpick - Platform: Windows - Katalon tool - Chrome, Firefox, IE

CLIENT STRATEGIC PROJECT | 8/2019 - PRESENT

QA

As project BAU the Client Strategic is the BAU's subproject. This platform inherited almost all functions from BAU project like open accounts, get investment static data, buy/sell securities and provide reports. But this platform needs to be approvel through BAU to complete the final step of the transactions and it is only support Westpac account instead of multiple accounts as BAU project.

Responsibilities	Technologies
- Analyze requirements from BA/Client; - Estimated time completion; - Write test cases, test coverage; - Raise/verify bug; - Report the test results; - Support directly customer issues and team members;	- Blackbox test - Gemini - MySQL - Confluence - REST API - Snagit - Platform: Windows - Chrome, Firefox, IE

PERSONALITY

- Proactive, patient, hard-working and focused
- Quickly learn, ability to find bug/issues
- Work well in a high-pressure environment
- Co-operate well with team mates and clients
